## Q1

Rate the Training (1 being worst and 5 being best):

☆ 4

---

## Q2

What did you like about the training?

Very clear explanations.

---

## Q3

What can be done to improve this training?

Could have taken fewer questions during the main content of the session. Was a little scattered as a result.

---

## Q4

No

Is it okay to share your feedback on our social media platforms?

---

## Q5

Respondent skipped this question

☆ 4

---

## Q2

What did you like about the training?

Practical examples

---

## Q3

What can be done to improve this training?

Would like to see more additional material on the modern apps/containers/cloud, new jdks (e.g. threads -> fibers)

---

## Q4

No

Is it okay to share your feedback on our social media platforms?

☆ **5****Q2**

What did you like about the training?

The good thing about training is a visualization of problem statements. Ram's articulation is excellent as he starts from basic to advance. y Crash tool is very user friendly.

---

**Q3**

What can be done to improve this training?

Agenda shared can be formulated in a better format.

---

**Q4****Yes**

Is it okay to share your feedback on our social media platforms?

---

## Q2

What did you like about the training?

Ram explained the session through examples which was very helpful.All Queries were addressed by him.

---

## Q3

What can be done to improve this training?

The training was excellent. One suggestion - If more case studies and solutions related to Heap and thread analysis can be added , that would be great.

---

---

## Q2

What did you like about the training?

The training provides how to avoid modern java application performance issues.

---

## Q3

What can be done to improve this training?

There was too much information packed into 9 hours. An extra hour would have been helpful with the last hour for discussion and case study only.

---

**Q4** **Yes**

Is it okay to share your feedback on our social media platforms?

---

☆ **4****Q2**

What did you like about the training?

The class was very well put together and we covered many areas that I was not aware of with yCrash. Please keep making yCrash better!! :-)

---

**Q3**

What can be done to improve this training?

At times we were pulled off the the primary training course path into some very interesting areas; however, this slowed down the course and we were not able to dive as deep into some of the planned course areas. Yea, I know this happens all the time.

## Q2

What did you like about the training?

I had quite a bit of JVM tuning/debugging knowledge & experience before I attended this training. The value of this training mainly stands on helping me to develop a whole picture of JVM and issues related, also covering them in enough depth. I believe the information delivered was distilled from thousands(minimum) hours of real-world research & troubleshooting, it can be hardly acquired from anywhere else.

---

## Q3

What can be done to improve this training?

I can hardly point any.

## Q4

Yes

Is it okay to share your feedback on our social media platforms?
